FORWARD

Devolution is intended to bring services closer to the people. The county budget process is a big part of doing this as it is how the County Governments allocates scarce resources to various projects, programmes and services. Participation by all stakeholders especially at local levels of government is viewed as a necessary condition for promoting good governance and hence public participation is about aligning the needs and demands of the public more closely with the choices of Government or County Government.

There are broad provisions for public participation in the county budgeting process both in the constitution and national law. Article 201(a) of the constitution requires openness, accountability and public participation in financial matters further the Public Finance Management Act, Section 125(2), demands that the County Executive Committees ensure there is public participation in the entire budget process.

Although the County may be dealing with vast interests from the four constituencies, effective participation requires that citizens and other actors understand county operations, processes and opportunities available for them to engage. Citizens must therefore be proactive and seize opportunities to influence decision making and resource allocation.

In February of every year counties are given about two weeks to study the National Budget Policy Statement and take it into account in preparing the County Fiscal Strategy Paper which provides information on planned expenditure and revenue and the key priority areas. It is a legal requirement for the CFSP to collect public views on its proposals. After it is tabled and passed in the County Assembly citizens must obtain copies of the CFSP, read it carefully to

check whether their needs and priorities, as presented at the public hearings have been considered.

Public participation aligns the needs and demands of the public more closely with the choices of County government officials. This suggests that public participation must occur at the formulation and approval stages of the budget, when priorities are being set. At this stage, public participation can enhance decision making by bringing information about public needs to the attention of policymakers as they prioritize their spending. This can lead to more equitable distribution of resources.

HON. MURIMI MURAGE
CEC MEMBER- FINANCE, ECONOMIC PLANNING, MARKETING & ICT

ACKNOWLEDGMENT

This is the 2015/2016 Kirinyaga County Budget Public Participation Report which will aid in the preparation of the County Fiscal Strategy Paper. It will assist the county in pushing its development agenda by setting the sector priorities. The paper seeks to propose the budgetary allocations to the different departments considering the limited resource base.

A lot of individual efforts were dedicated to the timely preparation of the public participation events. Special gratitude to the all Sub County administrators for coordinating and technical teams who conducted the public participations. Appreciation also goes to James Klmaru, Newton Orondoh, Silvester Njau, Joseph Kinyua, Tabitha Wambui and Shelmith Njagi for compiling the field reports

Finally special thanks go to the leadership and guidance of County Officials who worked tirelessly to ensure the success of the whole process. While it may not be possible to list all of them we appreciate Eliub Comba- Chief Officer Finance, J.N. Mbugua- Director Economic Planning, Naftaly Mwangi- Director Budget and Zephaniah Kiongo- Head of Accounts.

ELIUB COMBA
CHIEF OFFICER- FINANCE

INTRODUCTION

Public Participation is an open, accountable process through which individuals and groups within selected communities can exchange views and influence decision making. It is therefore a democratic process of engaging people, deciding, planning and playing an active part in development and operation of services that affect their lives. Public participation aligns the needs and demands of the public more closely with choices of the County Government and hence it must occur at the formulation and approval stages of the budget and planning, when priorities are being set.

The principles of the budget process are outlined in the Constitution and put into practice by the Public Financial Management Act (PFMA). Under Chapter 12 on public finances, the constitution emphasizes openness, accountability, participation, prudence and equity in county governance. It is expected from public participation in the Budget making process

- There will be increased level of information in the community
- The county will make informed priorities
- There will be effective and efficient service delivery
- The community capacity will be developed
- May result in effective Community Based Monitoring System
- May lead to equalization and redistribution of wealth and development in the county
- Community integration and ownership

During the month of February of every year counties are given about two weeks to study the Budget Policy Statement and take it into account in preparing the County Fiscal Strategy Paper. The CFSP is supposed to be tabled in the County Assembly by February 28. It provides information on planned expenditure and revenue and the key priority areas. It is a legal requirement for the CFSP to collect public views on its proposals. Citizens either as individuals, groups of people, CSOs and other non-state actors must obtain copies of the CFSP, read it carefully and check whether their needs and priorities, as presented at the public hearings have been considered.

KIRINYAGA COUNTY PUBLIC HEARINGS

Public participation in Kirinyaga County was organized in line with the Constitution and the Public Finance Management Act 2012. The County Treasury in collaboration with the Department of Budget and Department of Economic Planning held a series of meetings and agreed that it was necessary to organize public hearings in all 20 wards of Kirinyaga County. These public hearings took place between 10th and 12th February 2015 as follows;

Kirinyaga County Secretary notified the community about the public hearings through print media (nation newspaper of 6th February, 2015), public address system on 9th, 10th & 11th February, 2015, posters placed in strategic places and announcements in churches. Members of County Assembly were also invited to attend, support and mobilize members of the public. (See attached newspaper advertisement and letter sent to the Clerk, County Assembly in appendix 1&2 respectively)

The CO- Finance, Director- Budget and Director- Economic Planning sent their technical officers to all the venues at ward level to collect views from the community. The teams comprised of officers from the Department of Finance, Economic Planning, Marketing and ICT. The views were in form of projects and programmes to be considered in the 2015/2016 Kirinyaga County Budget.

Challenges and Recommendations during the Public Hearings

The public hearings were successful but nevertheless there were a few challenges, in some wards there were few public participants like Mutithi, Kerugoya and Nyangati (see attached list of participants from each ward in appendix 3) but the county teams sampled members of the public in the area, they found out that they were indeed aware of the events. There is therefore

need to sensitize the community on the need to attend public forums aimed at discussing development issues in the county.

In Ngariama Ward the meeting turned chaotic after members of the public demanded to be addressed by their Member of County Assembly who was not available at the time for them to know the progress of implementation of projects and programmes proposed in the last budget.

Members of the public also emphasized that timeline and venues for public consultations should be made known at least two weeks in advance, so that people have enough time to prepare themselves to participate.
